

## 32/64 Bit Windows PS Universal Driver

### Overview

These drivers support the 64 bit versions of Windows 2008 Server, Windows Vista, Windows 2003 Server and Windows XP as well as 32 bit Windows 2008 Server, Windows Vista, Windows 2003 Server, Windows XP and Windows 2000. They differ from our other drivers in the following ways:

- A single driver package is used across multiple product lines.
- The feature set and appearance of the universal drivers are different.

### Precautions

In most cases, the initial install of the driver will not select the correct accessories. After install, the driver should be configured with the correct model and accessories. The discovery will not detect Black and White models.

### Driver Features

These drivers can be installed on a Windows Server and shared via Point and Print to the other supported operating systems.

These universal drivers are implemented differently than our other drivers. The core functionality of the product is implemented, but there are some minor functions that are not implemented in the universal driver and there are other functions where the user interface is not as featured. The feature set in the universal driver should meet the needs of the overwhelming majority of users.

| Series                       | Minimum Firmware                                      |
|------------------------------|---|
| e-STUDIO205 Series / GA-1190 | GA-1190 v050  |
| e-STUDIO237 Series / GA-1190 | GA-1190 with any version that supports the 237 Series |
| e-STUDIO280 Series           | SYS 370   |
| e-STUDIO282 Series           | Special firmware SYS 23A, or SYS 300 or later         |
| e-STUDIO283 Series           | All firmware supported                                |
| e-STUDIO3510c Series         | SYS 200   |
| e-STUDIO450 Series           | SYS 370   |
| e-STUDIO4511c Series         | SYS 370   |
| e-STUDIO451c Series          | SYS 231   |
| e-STUDIO452 Series           | SYS 320   |
| e-STUDIO4520c Series         | All Firmware Supported                                |

| Series               | Minimum Firmware                              |
|----------------------|---|
| e-STUDIO453 Series   | All Firmware Supported                        |
| e-STUDIO455 Series   | All Firmware Supported                        |
| e-STUDIO6530c Series | All Firmware Supported                        |
| e-STUDIO850 Series   | Special firmware SYS 23A, or SYS 300 or later |
| e-STUDIO853 Series   | All Firmware Supported                        |
| e-STUDIO855 Series   | All Firmware Supported                        |

### Supported Models and Required Firmware

Upon release of the PS Universal Drivers, some models required special firmware to use the drivers. Currently, all supported models use production firmware.

### Installation

Install the driver by running setup.
