Symptom

The company Toshiba TEC is member of the SAP Printer Vendor program and offers within this program support for the printer model / device type pairs listed below.

For general information about the SAP Printer Vendor program please check note 1130927.

The printer model / device type combinations are visible in the newest data version of the "device type wizard". Please read note 1036961 for a description how to use the device type wizard and how to select one of the combinations shown below.

The device types are delivered as attachments to this note. Please download the files and proceed with the installation as described in note 1103422.

Certain features of the device types become active only with the following releases and support package levels:

Additional print options: (see note 1049778)

Note: Hold Print

To use the "Hold Print" function in e-STUDIO5520C/6520C/6530C, the system ROM version should be T430SY0*200 or later.

To use the "Hold Print" function in e-STUDIO2020C/2330C/2820C/2830C/3520C/3530C/4520C/3520Ci, the system ROM version should be T450SY0*201 or later.

The device type files [001] TT6CI11.PRI, [002] TT4EI11.PRI, [005] TT6CI21.PRI, [006] TT4EI21.PRI do not contain an entry for "Hold Print". If you want to use the "Hold Print" function, please follow the instructions below:

- In "Printer Initialization" screen, find a line @PJL COMMENT DSSC PRINT
PRINTMODE=NORMAL and change the value from "NORMAL" to "HOLD".

Label Printers

The device types listed below can be used to convert a label created using Smart Forms into the ZPL II printer control language and to print it on the Z-Mode enabled Toshiba TEC label printers. In this case, the label is designed in Smart Forms and not by an external program for designing labels. (See SAP Note 168368 for Smart Forms).

* B-SA 203dpi: B-SA4TM-G, B-SA4TP-G

* B-SA 300dpi: B-SA4TM-T, B-SA4TP-T

* B-EX4T2 print heads are Flat-type with Paper aligned to Left and B-EX4T1 print heads are Near-edge with Paper aligned to the Center.

Note:

1) To use LZPL driver, read SAP Note 750002 for release level requirements and restrictions.

2) When printing a Smart Form, user is advised to examine the actual printout of the form from

the printer, rather than just relying on the print preview image.

3) Following cases may occur while printing Smart Forms:

- a) Print position and font size are slightly different.
- b) Toshiba TEC's printer specifications apply, for example the memory capacity and the number of fields.
- c) If an object is placed outside the print area or the print start position of an object is placed within the print area but the end position is outside the print area, the part beyond the print area will be printed starting on the left end of the new line.
