

LEADERSHIP + INNOVATION + INTEGRITY

Close the Loop Resource Recovery 2013

Statement of Commitment: Plastic Recovery

Close the Loop is committed to meeting the EPEAT plastic 75% recovery requirement (no more than 25% WtE disposal) for 2013 on all consumables collected through one of our OEM's imaging consumable collection programs. Toshiba is one such OEM customer and we are therefore committed to meeting the 75% plastic recovery requirement for 2013 on Toshiba collected consumables.

For calendar year 2013 we expect to deliver recovery rates for plastic in excess of 80%.

To achieve these recovery rates Close the Loop uses proprietary processes that safely and effectively liberate, the metals, plastics and toner powder contained in the used consumables. Close the Loop uses advanced material separation technologies to deliver high quality, reusable streams of plastics. The technology and processes used by Close the Loop have been perfected over our 12 year history in dealing with imaging consumables and provide our customers with the highest recovery rates in the industry,

We will continue to improve our recovery rates in 2013 by adding additional capital investment in plastic separation and recovery technology.
