A powerful yet easy-to-use software tool, ScaleLink Pro joins individual scales to in-store computers/POS Servers as well as to central hosting computer networks. Its compatibility with Windows® 95, 98, NT, 2000 and XP ensures your stores are utilizing the latest technology.

For sophisticated weight-based product management made simple, utilize Scale Link Pro

ScaleLink Pro is loaded with features that simplify data management and product control, like the ability to export production totals. It also allows your customers to automatically distribute price changes to all scales to determine price and tare weight zones, allowing them to react quickly and easily to competitive pricing. By utilizing password protection and user profiles, store managers determine which employees can make changes and which can only view screens. Best of all, ScaleLink Pro is priced for less than similar programs on the market.

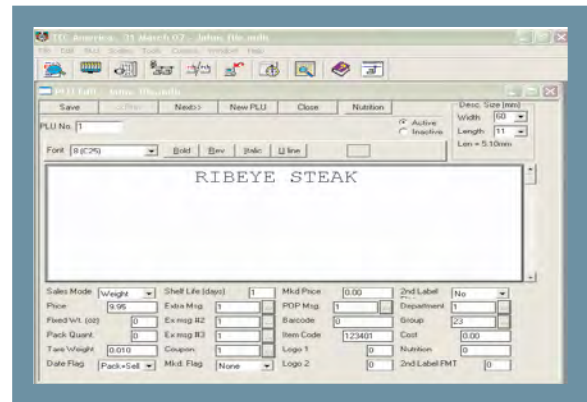

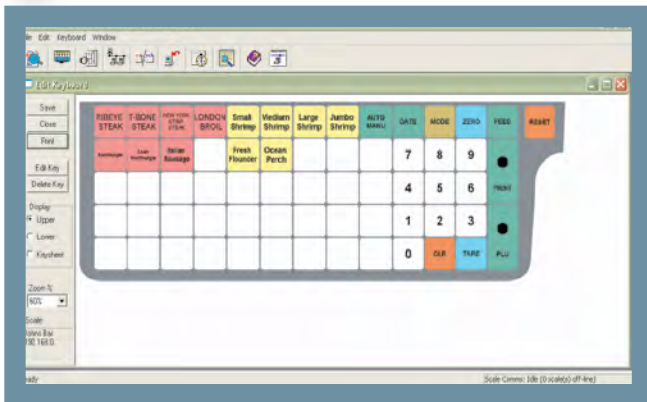

BC4000 TEC

SCALE LINK

PRO

BC4000 TEC
