e-BRIDGE® Global Print

WHERE IS THE CLOUD APP HOSTED?

e-BRIDGE® Global Print is a cloud-based app managed by Toshiba. The application is hosted on Microsoft® Azure® and Amazon S3™ storage. There is no need for an end customer to install software anywhere on premises or in a private cloud environment. The users for customers currently using Google or Microsoft 365® Cloud are automatically authenticated. There is no need to create or sync your current users.

Updates are automatic and new features will be added as they are developed.
